

CMX Snow Climatology - March

KCMX - March (1974-2008)

Ceilings in Snow

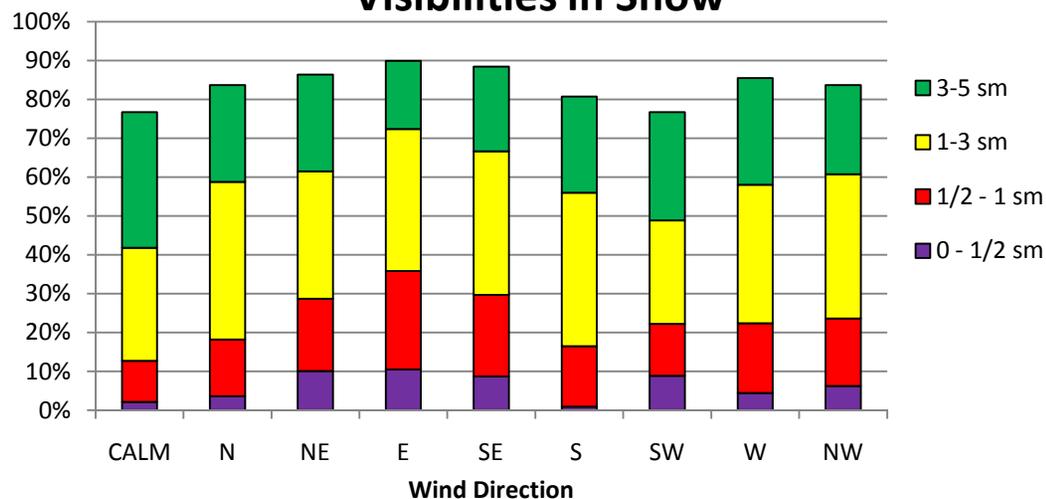

Ceilings:

Majority of ceilings low MVFR (1000 - 2000 ft).

Increase in the percentage of LIFR (200 - 500 ft) and IFR (500 - 1000 ft) ceilings for most wind directions compared to Jan and Feb – especially E, SE, and NW winds.

KCMX- March (1974-2008)

Visibilities in Snow

Visibilities:

Majority of visibilities IFR (1 - 3 miles).

Increase in percentage of LIFR visibilities (1/2 mile and 3/4 mile) – especially with NE, E, and SE winds.

KCMX- Hourly Observations with Snow March (1974-2008)
